CORNELL UNIVERSITY ANNOUNCEMENTS.....	<i>Inside back cover</i>

The data in this *Announcement*, while they relate primarily to the academic year 1963-1964, provide also a general description of the resources and the normal repertory of courses in Asian Studies which are usually available at Cornell. Most language and area courses and seminars in Asian Studies are offered regularly each year or, in some cases, in alternate years. However, changes do occur in the specific course offerings from year to year, and, particularly when faculty members are on leave, their courses may be temporarily omitted. The prospective student planning a curriculum should therefore consult the *Announcement of the College of Arts and Sciences* issued annually in April in which are listed, under the Department of Asian Studies, all courses relating to Asia to be given the following year in all divisions of Cornell University.

ASIAN STUDIES

CORNELL UNIVERSITY

THE DEPARTMENT of Asian Studies in the College of Arts and Sciences serves to coordinate for the entire University the diversified and substantial academic resources for instruction, training, research, and publication on Asia as these are developed in the several other departments and divisions of Cornell. Since 1870, when the first Chinese language course was taught at Cornell, the interests of the University in Asia have been greatly expanded. Beginning with the standard liberal arts subjects, Cornell has extended its concern with Asia to include, for example, work on agricultural development in China, Southeast Asia, and South Asia; applied work in linguistics and anthropology in Ceylon, India, Indonesia, and Thailand; city and regional planning and community development studies in India, Laos, and the Philippines; work in industrial and labor relations in Southeast Asia and India; research in demography in China and in nutrition and public health in South Asia and Southeast Asia; studies of educational development in modern China and of political socialization in Communist China; and for New York State social studies teachers, a special summer study program on Southeast Asia and China. These and many other varied Cornell interests in Asia in the humanities, social studies, and some natural sciences have led to a systematically planned and continuing University-wide organization of work in which emphasis lies in three particular regions of the Orient. Since 1946, following a formal University policy, Cornell has concentrated the intensive development of its scholarly resources in the Asian field on China, South Asia, and Southeast Asia.

As a means for strengthening its work on these contiguous and inter-related regions, the University maintains three multi-disciplinary area and language programs which are teaching, research, and administrative units of the Department of Asian Studies. A primary aim of the China Program, the South Asia Program, and the Southeast Asia Program is to make available to the entire student body extensive coverage of these areas in a variety of discipline courses, seminars, or tutorial work, and to encourage at the graduate level specialized interdisciplinary area and language training for students who at the same time are mastering a discipline and are interested in teaching, research, or other professional careers relating to these regions. A further aim of the three programs is to increase knowledge of these Asian areas through faculty and student research both on the campus and abroad. Related to these main objectives, of course, is the

building up of teaching and research materials and the dissemination of information and insights beyond the Cornell community through publications and off-campus consultantships, lectures, and training courses.

In each of the three programs the specialized knowledge and methods of a number of fields or disciplines are brought together and focused on the historical and contemporary affairs of the peoples and cultures of the area. The advanced student or research worker has readily available to him the geographically specialized personnel of faculty or staff from several different departments, and the resources of special collections of library and museum materials. He also benefits from the intangible assets of experience and associations built up by the programs through the years in the three areas themselves and in academic and other institutions all over the world which have interests in these regions. This area and language approach stresses the acquisition by the student of a general command of the scholarly tools and materials relating to his region of specialization while at the same time insisting that he deal with the area in terms of the pertinent methods and theory of a particular discipline in which he is majoring or taking his degree. The student's disciplinary training is not postponed while he spends all of his first few years of advanced work on language and generalized area studies only to shift later to concentrated work in his discipline field; instead, the student in one of the Cornell programs from the start pursues his discipline studies and his language and area work together as mutually supporting aspects of an interdependent program of study and research. Even at the undergraduate level the upperclass major in Asian Studies must concentrate in a sequence of discipline courses while working on an Asian area and language.

Among the more than thirty faculty members of the Department of Asian Studies are included specialists in anthropology, art, bibliography, economics, government and international relations, history, history of art, linguistics, literature, psychology, public administration, and sociology. Other professors in the various divisions of the University who have a special knowledge of Asia also participate in the work of the Department; and some of these, especially in agricultural technology, nutrition, and similar fields, have had years of valuable field experience in the Orient. Visiting experts, many from Asia or Europe, are brought regularly to the campus to supplement the work of the resident faculty of the University in Asian Studies.

Staff members of the three Asian area and language programs at Cornell work closely together on a basis of interest and collaboration. Students in each program are encouraged to take advantage of the opportunities offered by the others. Notable cases in point are combinations of work in Sino-Vietnamese studies, in the history of Asian art, in Buddhist studies, or in work on the overseas Chinese in Southeast Asia and elsewhere. Any student can readily draw on the resources of one or both of the programs other than the one in which he is concentrating. The advanced student

finds such a possibility of utilizing the University's wealth of resources on all three of these adjacent and closely related areas to be one of the great strengths of Cornell's organization of Asian studies.

The unusual and special facilities and resources of the three Cornell programs on Asian areas are described in a later section. In addition, and particularly in support of advanced studies on China or Southeast Asia, some area and language courses and adequate library materials are provided for scholars wishing to study the Japanese language or Japan, but no concentration of advanced work is offered on this area.

Asian languages are taught initially at Cornell by intensive methods which were developed at the University during World War II in a pioneering program supported by the Army and the American Council of Learned Societies. Through subsequent refinements and innovations Cornell has retained its leadership in the field of modern language instruction so that students beginning an Asian language achieve proficiency in speaking and reading it in the shortest possible time. This solid basis for language learning is enhanced by the constant association of the student with a native speaker in small classes under the guidance of professional scholars who are the sole instructors in more advanced language work. Instruction is regularly offered at Cornell in the following Asian languages: Burmese, Chinese (Mandarin), Fukiense (Hokkien), Hindi, Indonesian, Japanese, Javanese, Malay, Pali, Sanskrit, Sinhalese, Telugu, Thai, Urdu, and Vietnamese. Many of these languages are offered in intensive summer courses at Cornell or Yale University (through a co-operative arrangement whereby they are taught in Ithaca one summer, 1964, and in New Haven in the alternate summer, 1965), or at Columbia University, or elsewhere; or, in the case of South Asian languages, at summer institutes held on different American university campuses each year.

In 1959 the federal government accorded recognition to all aspects of the work in Asian studies at Cornell as contributing to a national effort to increase knowledge and understanding of foreign areas and languages. Under Title VI of the National Defense Education Act of 1958 three language and area centers were established at Cornell with government aid which has been renewed each subsequent year: the East Asia Language and Area Center deals with China and Japan; the South Asia Center, with Ceylon, India, and Pakistan; and the Southeast Asia Center, with all the countries of the intervening region.

RESOURCES FOR ADVANCED STUDY AND RESEARCH

The most important continuing resource for scholarly work in Asian studies at Cornell, an essential element of the programs of instruction, training, and research in these fields, is found in the outstanding Asian

collections of the Cornell University Library, which is one of the half dozen great university libraries in the country. The Wason Collection, the nucleus of which was given in 1918 and endowed by Charles W. Wason, '76, includes a library of Western language books, pamphlets, periodicals, and manuscripts on China and the Chinese (including those overseas) which is unique in size and scope and in the number of rare items. A working library of more than 70,000 volumes in Chinese, particularly strong in Ch'ing and more recent holdings, is being rapidly expanded by purchases and gifts such as a recent one from the Academia Sinica given as a memorial to its past head, the distinguished Cornell alumnus, Dr. Hu Shih.

Also housed in the Wason Collection is the most comprehensive library of vernacular and Western language materials on Southeast Asia found in this hemisphere. These include not only the well-known Indonesian and Thai language holdings which attract scholars from all over the world, but important materials on other parts of the region as well, such as the valuable personal papers and books of Cornell's President Jacob Gould Schurman, who headed the first Philippine Commission, and on whose initiative Cornell began to acquire what has become a comprehensive set of official Philippine documents. It has been estimated that in recent years, through participation in the Farmington Plan and an active supplementary purchasing program, the Wason Collection annually acquires about sixty per cent of all books and fifty percent of all serials being published in Southeast Asia. Similarly, Cornell is one of a few American universities which regularly receives all important books published in India which are added, together with special purchases of older works, to the Library's already excellent holdings of Hindi and other vernacular and Western language materials on the countries of South Asia.

These collections are shelved in the new John M. Olin Graduate Research Library. Here, too, are the Wason Reading and Conference Rooms and the offices of the curator, bibliographers, and catalogers of the Asian collections, who also serve as valuable resource persons for scholars in the Asian field. In the same building are maintained the Human Relations Area Files containing systematically organized data, translations, and bibliographies on many Asian societies. Much valuable material on Asia is also found in special libraries on the campus, such as the Mann Library of the College of Agriculture and the libraries of the College of Architecture or the School of Industrial and Labor Relations, the holdings in all such specialized collections, which are international in scope, being included in a general catalog in Olin Library. These facilities make Cornell an ideal location for the preparation of the *Bibliography of Asian Studies*, the largest annual bibliography on Asia published in this country. The Bibliography, under the editorship of Miss Gussie Gaskill from 1946 to 1955 and now of Mr. Richard C. Howard, Curator of the Wason Collection, is issued each year by the national Association of Asian Studies.

The work of the Department of Asian Studies on the campus, in Asia, and elsewhere, is closely linked not only with the activities of other departments and with the development of library resources, but also with the programs of a series of projects at Cornell or at other institutions concerned wholly or in part with studies of Asian problems.

Important among such intramural links is that with the Cornell Center for International Studies. Through the Center, students specializing in Asian studies are brought into association with a wide variety of local or outside programs which may have relevance for their work: a whole series of projects on low-income countries carried on by various departments, schools, and colleges of the University, including the International Agricultural Development Program, the International Program in Nutrition, the International Population Program, the interdisciplinary research seminars and colloquia of the Modernization Workshop, or the Cornell field projects in applied anthropology or in industrial and labor relations; comparative studies of international law conducted by the Law School; or the Cornell studies of the Soviet Union and its foreign policies. Study and research in the Asian field at Cornell are also facilitated by the resources of the Social Science Research Center, the Statistics Center, the Computing Center, or the Center for Aerial Photographic Studies which has conducted important surveys for natural resources development and regional planning in parts of Asia.

Cornell and the Department of Asian Studies have also developed an unusual number of formal and informal extramural associations designed to facilitate the work of staff and students. Notable among these is a unique British and American joint venture in the study of Asian societies on which the Department embarked in 1962. Under this arrangement, supported by American and English foundation grants, Cornell University, the London School of Economics and Political Science, and the School of Oriental and African Studies, the last two being schools of the University of London, share their faculties of nearly sixty specialists, their language teaching, research, and other resources to conduct a combined program of graduate training and field research on China and Southeast Asia. Funds support field research of graduate students from both universities; support Cornell students at London and London students at Cornell where this would have special value; enable students of each university to be guests of the other enroute to or from field work in East Asia; support faculty research in the field; finance periodic field seminars of student and faculty research workers to be held variously in Bangkok (in 1963 under Professor Lauriston Sharp), in Kuala Lumpur (in 1963 under Professor Raymond Firth), in Hong Kong, or in Singapore; and provide for the exchange of faculty between Cornell and the two schools at London. Professor G. William Skinner, who has worked in China and Southeast Asia, directs the project at Cornell; Dr. Maurice Freedman, anthropologist at the London School of Economics and also a specialist on China and Southeast Asia, is the London director.

In the South Asia field, Cornell is one of the small group of American universities which founded, helps maintain, and participates in the work of the American Institute of Indian Studies at Poona which was recently organized to facilitate study and research in India by Indian and American scholars specializing on various aspects of Indian civilization and contemporary affairs. The University also maintains close links with a number of research agencies, programs, and institutions of higher learning in India, such as the Deccan College Linguistic Program, the Central Institute for Labor Research in New Delhi, and agencies of the Indian Government, the U. S. Department of Agriculture, and foundations concerned with research in agricultural development in the area. Cornell's interest in international agriculture has also involved the University in a long and mutually rewarding association with the College of Agriculture of the University of the Philippines. Elsewhere in Asia, and notably in Japan, Taiwan, Hong Kong, Indonesia, and Thailand, Cornell has established close cooperative ties with learned societies and educational and research institutions. Nor has Cornell neglected the development of extramural relations with other American institutions: it collaborates with Harvard in supporting Sino-Vietnamese studies; with Yale in organizing intensive summer courses in Southeast Asian languages; with neighboring universities and colleges in holding annual conferences on Asian affairs; and with the Library of Congress in a purchasing and cataloging program which reciprocally increases the usefulness of the Asian holdings in both the national and the Cornell libraries.

The many Cornell resources for advanced study and research in the Asian field have been developed primarily by a faculty actively interested in its own research projects and programs. But Asian research at Cornell, whether on the campus or abroad, is not conducted in isolation from teaching and training activities. Students working on Asia may participate in Cornell research projects whether in the library or in the field; and the problems, methods, and results of the many interrelated Cornell research activities are dealt with in courses and seminars and special training programs designed for students in Asian studies or for others planning to work in foreign cultures. The international interests and activities of a University such as Cornell, which combines on one campus the unusual range of discipline fields found in its several colleges and schools, and the Cornell organization of its resources for intramural and extramural instruction, training, and research, provide among American universities a unique context of stimulation and support for students pursuing Asian studies.

GRADUATE WORK ON CHINA, SOUTH ASIA, AND SOUTHEAST ASIA

THE GRADUATE SCHOOL at Cornell is devoted to developing creative scholars and scientists who will be prepared for independent research, responsible teaching, or other fully professional activities in their fields of specialization. The faculty believes that this goal cannot be achieved simply by extension of the undergraduate system of formal courses and course credits. Instead, the aim is to release the student from formal requirements as soon as he is sufficiently well-grounded in the fundamentals of his field to pursue advanced studies motivated by his goals and interests, and aided by the advice and guidance of the faculty.

The most distinctive feature of the Cornell plan for graduate study is the provision for supervision of each student's program of study by a Special Committee selected by the student. Thus candidates for the Ph.D. degree choose as areas of concentration or specialization one major and two minor subjects or fields. The Special Committee, then, consists of three faculty members, one to represent each subject. The composition of this Special Committee may be changed at any time on the initiative of the student.

The principal requirement to be met by a candidate for an advanced degree at Cornell is to satisfy his Special Committee that his general and specialized knowledge of his major and minor fields meets a high standard of excellence and that he is capable of conducting independent research and reporting on it as demonstrated by the completion of an original research project and a thesis which are acceptable to his Committee.

This committee system at Cornell provides a kind of apprenticeship in which the student learns the skills of a scholar and scientist by practicing these skills under the guidance of experienced persons. It follows that there are no set course requirements in the Cornell Graduate School. The student, in consultation with his Special Committee, plans a program of courses, seminars, informal study, independent reading, and original research based upon his own background, interests, and objectives. Under this system faculty members and students get to know each other well so that the student may be advised and his progress evaluated intelligently. The size of the graduate student body at Cornell is kept small; a ratio of some one hundred graduate students in Asian Studies, some of whom at any given time are doing field research abroad, to over thirty faculty members is now current.

A candidate working in the field of Asian Studies for an advanced

TAIWAN: In the Fields.

degree must do his major work in one of the relevant discipline fields of the humanities, social sciences, or certain natural sciences as recognized by the Graduate School. It is in this major field that he receives his degree. Cornell University offers no advanced degrees in Chinese, South Asian, or Southeast Asian studies as such. Unless he is carrying a major or minor in Chinese, South Asian, or Southeast Asian history, in Asian art history, or in Chinese literature, the student is expected to elect Asian studies as one of his two minor fields, and within this field he may concentrate his area study on China, South Asia, or Southeast Asia. The work in his major and minor fields in his discipline studies and his area work, is coordinated through the course of his graduate study. The integration of discipline with area knowledge is to be demonstrated in his dissertation, written to satisfy the requirements for his degree in a discipline field, but on a topic relating to his special area interest.

The Ph.D. candidate working in the field of Asian Studies will be examined on his specialized knowledge of China, South Asia, or Southeast Asia. Details of the requirements are given in the description of the three programs which follow.

For an M.A. candidate, less specialized knowledge is expected, and the amount of reading and the number of courses recommended are appreciably less. Study of an Asian language is not mandatory for the M.A. except in Chinese literature.

The candidate for a Ph.D. ordinarily is expected to attain sufficient proficiency in an Asian language so that he will be able to utilize it in his research and in the preparation of his dissertation. The language re-

quirements of the Graduate School are fully stated in its *Announcement*. Because of the special language study and the field research often required, the Ph.D. candidate specializing in Asian studies usually takes more than the stipulated minimum six terms of residence to complete his training. The M.A. also frequently takes longer than the minimum two terms, since candidates seldom enter with adequate preparation for advanced work in Asian studies. The extra burden imposed by area and language work in addition to the full program of study in a discipline may lead graduate students in Asian studies to devote one or more summers to intensive language study; indeed, prospective graduate students who must begin the study of an Asian language are strongly urged to take what is practically the equivalent of a normal year's work in one of the intensive summer Asian language courses offered at Cornell or elsewhere each year.

The minor in the field of Asian Studies is open also to graduate students who are not candidates for degrees and who wish to devote their entire time to area or language study. Particularly welcome are those preparing for definite assignments in Asia, such as the foreign service officers who have been coming to Cornell since 1946 for special training in Asian studies and the various agricultural specialists and missionaries who have taken intensive work on China, South Asia, or Southeast Asia.

FELLOWSHIPS

Information concerning the very substantial financial assistance available to graduate students in Asian studies from funds at the disposal of the three Cornell Asian area and language programs will be found in the following pages and in the *Announcement of the Graduate School*. Graduate students in the Asian field may also apply for the many other fellowships, scholarships, and teaching and research assistantships offered by the University and by its various departments.

The attention of interested seniors and graduate students who are American citizens or U.S. residents is also invited to the National Defense Foreign Language Fellowships offered by the United States Office of Education for language study together with area and discipline work. Application forms for these N.D.F.L. Fellowships should be obtained directly from the Graduate School of Cornell University. Also available to the same groups and to Canadian citizens are Foreign Area Training Fellowships administered by the Foreign Area Fellowship Program, 444 Madison Avenue, New York 22, New York. These are granted on a competitive basis for on-campus study in the United States and for study or field research overseas. Students should also note that United States government awards under the Fulbright-Hays Act are available to American citizens to support predoctoral research in Hong Kong, India, Japan, Malaya, Pakistan, the Philippines, Singapore, Taiwan, and Thailand. Applications for awards under the Fulbright-Hays Act are made to the Conference

Board of Associated Research Councils, 2101 Constitution Avenue, Washington 25, D. C.

CHINA PROGRAM

Staff: Mr. Harold Shadick, *Director*; Messrs. Knight Biggerstaff, Nicholas Bodman, Fu-chung Chin, Charles F. Hockett, Richard Howard, John W. Lewis, Ta-Chung Liu, John T. Ma, Robert M. Marsh, Miss Harriet C. Mills, Mrs. Pei S. Ni, Messrs. G. William Skinner, Arthur P. Wolf, Martie W. Young.

The China Program is at once a comprehensive area training institute and the sponsor of research. It brings together faculty members from nine fields of the Graduate School to develop and coordinate both endeavors.

To be a member of the China Program a graduate student must fulfill the following conditions: (1) If majoring in anthropology, economics, government, linguistics, psychology, or sociology he must take a minor in Asian studies (China) or in modern Chinese history, Chinese literature, or Chinese art history; or he must major in modern Chinese history, Chinese literature, or Chinese art history. (2) He must present Chinese as one of the languages in which he is examined by the Graduate Language Examination Board. (3) He must utilize sources in the Chinese language in the writing of his dissertation. (This last requirement applies to M.A. candidates only in the case of majors in literature.)

REQUIREMENTS AND RECOMMENDED COURSES

The requirements of the majors and minors possible under the China Program are as follows:

MINOR IN ASIAN STUDIES (CHINA)

The Ph.D. candidate shall demonstrate in the A Examination a broad multidisciplinary knowledge of modern China. Ordinarily he will be expected to have taken a minimum of three one-semester advanced courses or seminars on China in at least two disciplines and to have done additional reading in consultation with the members of his special committee responsible for this minor.

The M.A. candidate ordinarily will take a minimum of two one-semester advanced courses or seminars on China.

MAJOR IN MODERN CHINESE HISTORY (NINETEENTH AND TWENTIETH CENTURIES)

For the Ph.D.: Command of the primary sources and monographic literature in Chinese and Western languages; and completion of a dissertation using Chinese source materials. Ordinarily a minimum of four one-semester

ter advanced courses or seminars on China, including one in another discipline, is recommended.

For the M.A.: Familiarity with the monographic literature in Western languages; and an M.A. essay. Ordinarily three one-semester advanced courses or seminars on China, including one in another discipline, are recommended.

MINOR IN MODERN CHINESE HISTORY

For the Ph.D.: The candidate shall demonstrate in the A examination a thorough knowledge of the primary sources and monographic literature in Western languages and shall have written a research paper in modern Chinese history. Ordinarily he will be expected to have taken a minimum of three one-semester advanced courses or seminars on China including one not in history.

For the M.A.: A minimum of two one-semester advanced courses in modern Chinese history.

MAJOR IN CHINESE LITERATURE

Graduate work in Chinese literature assumes at least two years of Chinese language study prior to admission.

For the Ph.D.: (1) Familiarity with representative works in classical and vernacular Chinese and with critical studies in Chinese; (2) broad knowledge of the available translations of Chinese literature and critical studies in other languages; (3) specialized knowledge of at least two subfields such as the Confucian or Taoist classics, poetry, drama, fiction, classical prose, or twentieth-century writings; (4) writing of a dissertation.

For the M.A.: Roughly the same as (1) and (2) under the Ph.D. and the writing of an essay.

MINOR IN CHINESE LITERATURE

For the Ph.D.: Roughly the same as (1) and (2) under the Ph.D. major.

For the M.A.: At least two one-semester courses in classical texts.

MAJOR IN CHINESE ART HISTORY

For the Ph.D.: (1) a comprehensive knowledge of the major periods of Chinese art in the areas of painting, sculpture, and the related minor arts; (2) familiarity with the basic literature on Chinese art available in Western languages; (3) a demonstrated command of the critical literature on art in Chinese; in the case of a student who shows command of such literature in Japanese, the requirement in Chinese material will be reduced; (4) at least one advanced course on China in a related discipline such as literature, history, philosophy, or religion; (5) the completion of the dissertation.

For the M.A.: Ordinarily (1) and (2) under the Ph.D. major plus the writing of an M.A. essay.

MINOR IN CHINESE ART HISTORY

For the Ph.D.: Normally (1) and (2) under the Ph.D. major.

For the M.A.: A minimum of two advanced courses on Chinese art.

RESEARCH AND FIELD TRAINING

Research under the China Program is conducted in each of the nine associated disciplines. The focus of much of the research is the society, polity, and economy of modern and contemporary China. Projects currently being carried on by staff members include the following: (1) *anthropology*: Chinese acculturation in Java; social organization in modern and contemporary China; (2) *art history*: Ming and Ch'ing painting; (3) *economics*: national income and economic growth in the Republican and Communist period; (4) *history*: education during the late nineteenth and early twentieth centuries; (5) *linguistics*: comparative studies of Chinese and Tibeto-Burman languages and of Chinese dialects; syntax of literary and colloquial Chinese; (6) *literature*: thirteenth century drama; the twentieth-century literary revolution; (7) *political science*: leadership techniques of the Communist Party; political socialization; (8) *social psychology*: personality and child-training practices; and (9) *sociology*: social stratification and deviant behavior in Communist China.

Quite apart from the projects listed above, the staff in the social sciences and history is prepared to direct doctoral research on appropriate topics in Ch'ing, Republican, and Communist China. Students of art history and literature may specialize in any period or genre.

Research under the program is carried on both at the University and in East Asia. Research at Ithaca makes use of the library resources of the Wason Collection on China and the Chinese, of special documentary collections, and of empirical data collected by social scientists in East Asia. Field research has been carried on under China Program auspices in Taiwan and Hong Kong and among Chinese communities in Southeast Asia. Program policy holds that direct contact with Chinese society is valuable for all students of China. From it the student of art history, history, or literature gains background knowledge and acquaintance with Chinese scholars, archives, museums, and libraries. While benefiting in these various ways, the student of a social science also relies on direct contact with Chinese communities for the substantive data of his doctoral dissertation.

Exceptional opportunities for field research are now assured to China Program students through the London-Cornell Project. This will make it possible for social scientists in the China Program, whether faculty or student, to spend from one to two years in the field, to participate in field seminars, and to benefit from formal and informal contact with China specialists on the staff of the University of London.

FELLOWSHIPS AND ASSISTANTSHIPS

Several China Program fellowships are offered each year to first year graduate students. These awards carry stipends of up to \$3000, plus tuition and fees. Research assistantships are available from time to time.

A limited number of London-Cornell Studentships are available for advanced Ph.D. candidates in the social sciences (including modern history) who have already had at least one year of resident study in the China Program. These fellowships are tenable for further study during an academic year at the London School of Economics and Political Science or at the School of Oriental and African Studies at the University of London. Stipends range from \$2000 to \$3000, plus air fares and tuition and fees. London-Cornell Field Research Grants are open to China Program Ph.D. candidates in the social sciences (including modern history) after they have had appropriate training at Cornell or at Cornell and London. They are tenable for 18 to 24 months for the purpose of dissertation research. Recipients of London-Cornell Field Research Grants may conduct their research in any part of East Asia where Chinese communities or materials on modern and contemporary China are accessible. Stipends range up to \$12,000, including travel and research expenses.

Prospective graduate students of the China Program as well as students in residence may apply for various assistantship, fellowship, and scholarship awards offered by Cornell University and administered by the Graduate School and the academic departments. Additional information and application forms for China Program fellowships and assistantships may be obtained by writing to the Director, China Program, Franklin Hall, Cornell University. Inquiries regarding other financial aids should be addressed to the Graduate School or to the department concerned.

SOUTH ASIA PROGRAM

Staff: Mr. Morris E. Opler, *Director*; Messrs. Allen C. Atwell, Archie T. Dotson, Gordon H. Fairbanks, James Gair, Gerald B. Kelley, Arthur Lall, John W. Mellor, Bal Govind Misra, Martie W. Young.

The increasing importance of the peoples of the Indian subcontinent and of the role they play in world affairs enhances the need for providing opportunities in America for training and research in the field of Indic studies. The South Asia Program at Cornell, dealing with India, Pakistan, and Ceylon, is organized and equipped to help meet this need. Since 1948 it has sponsored a series of research projects on India and Ceylon, and it has trained a distinguished group of younger American and South Asian scholars in South Asian area and language studies. The program faculty includes members from the field of agricultural economics, anthropology, art, government, history, history of art, and languages. Sanskrit, Pali, Hindi, Urdu, Telugu, and Sinhalese are languages regularly offered at Cornell. Arrangements may be made for the intensive study of other South

TAIWAN: In the Temples.

Asian languages at summer institutes held on different American university campuses each year.

Qualified graduate students interested in specializing in the South Asian field minor in Asian studies with concentration on South Asia (India, Pakistan, or Ceylon), and major in a discipline, unless they major or minor in South Asian history or South Asian art history. Advanced degree requirements for this minor are roughly comparable in terms of South Asian materials to those for the Southeast Asia concentrations given below. The doctoral candidate must have a reading knowledge of Hindi or, depending upon the subarea of his specialization, some other important language of South Asia.

RESEARCH AND FIELD TRAINING

The doctoral dissertations of students in the South Asia Program are normally based on research done in India, Pakistan, or Ceylon. Students' field research may benefit from the advice and guidance in the field of a program staff member, two of whom, for example, were in India during 1963-1964. Staff members of local institutions with which Cornell maintains close ties have provided valuable assistance to Cornell students working in India. Opportunities exist for graduate students to become associated with Cornell-sponsored research in South Asia or to carry on independent research there; every effort will be made by the program staff to aid the qualified student to obtain financial support for a field training or research project in one of the countries of the area.

Research interests under the South Asia Program are focused largely on recent or contemporary developmental problems of the countries of the area—on changes taking place in the economic, political, social, religious, artistic, and intellectual life of the region. A long-term research project in progress in India is primarily concerned with the ramifying problems of introducing technological changes and the influence of such changes when adopted. For this research program, faculty and students in anthropology have carried on, since 1949, an extended and varied series of rural and urban community studies in several different regions of India from the Deccan into the Himalayan foothills. A major related project sponsored by the Cornell International Agricultural Development Program is concerned with the entire agricultural sector of the Indian economy. At the same time other studies in urban renewal and regional planning, public administration, the role of government in cultural change, and recent movements in the arts and in religions and ideologies are in process under faculty direction. Cornell is also making a special study of the Sinhalese language and of linguistic problems of Ceylon, a nation so far much neglected by American scholars. The new nations of South Asia present so many problems for study that the areas of inquiry open to students and staff members are limited only by availability of research means.

FELLOWSHIPS AND ASSISTANTSHIPS

Fellowships and assistantship awards are available to qualified Cornell graduate students minoring in Asian studies with a concentration on South Asia. Students in the South Asia Program are also eligible for assistantships in their major discipline departments, for fellowships and scholarships offered by the Cornell Graduate School, for National Defense Foreign Language Fellowships, and for Foreign Area Training Fellowships. Additional information on financial aid may be obtained by writing to the Director, South Asia Program, Morrill Hall, Cornell University.

SOUTHEAST ASIA PROGRAM

Staff: Mr. George McT. Kahin, *Director*; Messrs. Allen C. Atwell, John M. Echols, Frank H. Golay, J. P. Honey, R. B. Jones, Jr., Nicolaas G. M. Luykx, Giok Po Oey, Robert A. Polson, Lauriston Sharp, G. William Skinner, Miss Barbara Ward, Messrs. John U. Wolff, O. W. Wolters, Martie W. Young.

The Southeast Asia Program was established in 1950 for the further development at Cornell of instruction and research on Southeast Asia as a region and on the individual countries of the area: Burma, Cambodia, Indonesia, Laos, Malaya, the Philippines, Thailand, and Vietnam. Substantial facilities for study and research enable the program to offer both the undergraduate and graduate student exceptional opportunities for general or specialized work on all of Southeast Asia in various fields of the humanities, social studies, and some natural sciences, as well as in interdisciplinary area courses and seminars. An understanding of the revolutionary changes taking place in the region lying between China, India, and Australia requires special knowledge and guided field experience in the area; much fundamental and pioneering research remains to be done there; and a need continues for students trained in Southeast Asian studies in both academic and nonacademic professions. The Cornell Southeast Asia Program is well organized and equipped to help meet such needs.

The candidate for a graduate degree who is interested in specializing on Southeast Asia will major in a discipline (e.g., agronomy, anthropology, city and regional planning, economics, government, linguistics, nutrition, sociology) and will take as a minor Asian studies (with concentration on Southeast Asia). The only exceptions to this pattern are in the fields of history and of art history. If the candidate's interest is Southeast Asian history or Southeast Asian art history, he may major or minor in either one. If he majors in one, he may choose a minor in Asian studies only if his minor concentration is on China or South Asia rather than Southeast Asia. In all cases, it will be noted, the applicant is accepted as a candidate for a degree only in a discipline field. A candidate who is accepted for major work in Southeast Asian history, for Southeast Asian art history, or for major work in a field other than these with a minor in Asian studies

(with concentration on Southeast Asia) automatically becomes a member of the Southeast Asia Program.

REQUIREMENTS AND RECOMMENDED COURSES

The Ph.D. candidate in the Southeast Asia Program is expected to develop a general knowledge of the cultures and history of the area; a specialized knowledge of one or more Southeast Asian countries; and, except in special circumstances, a reading knowledge of a language of the area. The M.A. candidate is expected to develop a substantial, but less extensive, knowledge of the area and one of its countries, and is not required to have a knowledge of one of its languages.

The student normally prepares himself to meet these requirements by taking: (1) Asian Studies 501-502 (Southeast Asia), in which the countries of the region are studied from the point of view of several disciplines, both in depth (with a single-country focus) and comparatively; (2) other seminars or courses in which the student follows a specialized discipline approach to the area; (3) appropriate language work. It is expected that the dissertation of the candidate for the Ph.D. and the essay of the M.A. candidate will be substantially concerned with Southeast Asia or one or more of its component countries. The number of area seminars to be taken is decided in consultation with the student's Special Committee, but the Ph.D. candidate usually takes no less than three semesters of such work (including Asian Studies 501 or 502) and the M.A. candidate no less than two (including Asian Studies 501 or 502).

Instruction is regularly offered at Cornell in the following important languages of the region: Burmese, Chinese (Mandarin), Fukienese (Hokkien), Indonesian, Javanese, Malay, Thai, and Vietnamese. Also available at Cornell are Dutch, Portuguese, and, by special arrangement, such other living languages of Southeast Asia as Ilocano or some of the Tibeto-Burman languages. Through the London-Cornell Project the advanced student may obtain instruction at the London School of Oriental and African Studies in Cambodian, Cantonese, Hakka, Mon, and Sundanese.

RESEARCH

Research activities under the Southeast Asia Program have been and continue to be concerned primarily with (1) cultural stability and change, and especially the consequences of modern Western influences, including developments resulting from various American, United Nations, or other technical aid programs in the region; (2) political behavior and political organization; (3) international relations between Southeast Asia and the Chinas, India, the Soviet Union, and the United States; (4) economic development; (5) economic nationalism; (6) comparative linguistics of Southeast Asia; (7) the organization and role of the major Asian minorities in the region, particularly the Chinese; (8) tribal peoples and their acculturation. A number of the seminars at Cornell and research projects in

the field are concerned with one or another of these areas of inquiry. The work of students and staff members, however, is by no means restricted to these problems. The program has sponsored long-term interdisciplinary research projects on Thailand, Indonesia, and the Philippines, and on the area's Chinese minorities; at the same time, staff members or students of the program have done field work in every Southeast Asian country.

FIELD TRAINING

The advanced graduate student in the Southeast Asia Program will normally go to one of the Southeast Asia countries to carry out research for his doctoral thesis. Such field experience is considered an essential part of the student's education as well as a demonstration of his ability to combine his training in a discipline with his Southeast Asian area and language knowledge. It is expected that each year staff members from Cornell or London will be in Southeast Asia carrying on research. They will conduct London-Cornell Project seminars and will stand ready to provide guidance or supervision, whenever practicable, to advanced students from Cornell or elsewhere. The program maintains cordial and close relations with universities, learned societies, research institutions, and government agencies in Southeast Asia with which the student in the field may find it profitable to work.

FELLOWSHIPS AND ASSISTANTSHIPS

Several Southeast Asia Program fellowships and research assistantships are offered each year to incoming or established graduate students undertaking work in residence in the Southeast Asia Program. The fellowships carry stipends up to \$3000 plus tuition and University fees. Fellowships and assistantships are open only to qualified candidates for an advanced degree at Cornell. They may be awarded to Americans or Canadians, nationals of Southeast Asian countries, or, in exceptional cases, nationals of other countries.

In all cases these awards will be made only to applicants who are able to demonstrate a serious scholarly interest in Southeast Asian studies; who show the greatest promise of becoming qualified Southeast Asian regional experts with specialization in a relevant discipline of the humanities, social sciences, or certain natural sciences, and who are admitted to the Cornell Graduate School for advanced work in such a discipline. Previous experience in Southeast Asia or in the study of that area is not necessarily required. It is important that the applicant be able to show that advanced work in a major subject offered at Cornell combined with work in the Southeast Asia Program will make his future professional activities more effective; and this requirement is particularly important for a student in the natural sciences. Except for London-Cornell Studentships (noted below), fellowships are offered only for study in residence at Cornell and cannot be held while the student is in the field. Appoint-

ments are made for one academic year at a time. Reappointment is subject to reapplication and review.

The primary purpose of these awards is to encourage graduate students to acquire a substantial knowledge of Southeast Asia while majoring in one of the discipline fields of the Graduate School. Accordingly, they are offered only to students who, while working in such a field, participate fully in the Southeast Asia Program. The recipient of a fellowship may be asked to devote up to six hours each week under faculty supervision to work connected with the program.

A limited number of London-Cornell Studentships are available for advanced Ph.D. candidates in the social sciences (including modern history) who have already had at least one year of resident study in the Southeast Asia Program. These fellowships are tenable for further study during an academic year at the London School of Economics and Political Science or at the School of Oriental and African Studies at the University of London. Stipends range from \$2000 to \$3000, plus air fares and tuition and fees. London-Cornell Field Research Grants are open to Southeast Asia Program Ph.D. candidates in the social sciences (including modern history) after they have had appropriate training at Cornell or at Cornell and London. They are tenable for 18 to 24 months for the purpose of dissertation research. Recipients of London-Cornell Field Research Grants may conduct research in any part of Southeast Asia. Stipends range up to \$12,000, including travel and research expenses.

A student under the program at Cornell will be given every assistance in preparing applications to foundations or other sources for grants-in-aid to help finance his period of field training and research in Southeast Asia.

Prospective graduate students of the Southeast Asia Program as well as students in residence may apply for various assistantship, fellowship, and scholarship awards offered by Cornell University and administered by the Graduate School and the academic departments. Additional information and application forms for Southeast Asia Program fellowships and assistantships may be obtained by writing to the Director, Southeast Asia Program, Franklin Hall, Cornell University. Inquiries regarding other financial aids should be addressed to the Graduate School or to the department concerned.

SUMMARY OF REQUIREMENTS OF THE GRADUATE SCHOOL

Applicants for graduate work in the Field of Asian Studies must file the regular application form supplied by the Graduate School, together with the required transcripts and recommendations. Applicants in some fields are asked to submit their scores on the Graduate Record Examination. It should be remembered that candidates for a degree may not major in Asian Studies, although this is an acceptable field of concentra-

tion for noncandidates. Degree candidates must major in one of the regular discipline fields of the Graduate School, which include Chinese literature, Chinese, South, and Southeast Asian history, and the history of Asian art.

To be admitted to the Graduate School and to the major field of study an applicant must hold a baccalaureate degree from a college or university of recognized standing or have work equivalent to that required for such a degree; must show promise of ability to pursue advanced study and research; and must have had adequate preparation to enter upon graduate study in the field chosen. For admission in the fall term, applications should be filed before February 1, although later application does not necessarily bar admission.

The minimum residence requirement for a Master's degree is two full terms. The language requirement for the Master's degree is specified for each field of instruction separately in the *Announcement of the Graduate School*. Requirements for the M.A. degree include work in a major and one minor subject, the writing of a thesis acceptable to the candidate's Special Committee, and the passing of a final examination conducted by the same committee.

The minimum residence requirement for the degree of Doctor of Philosophy is six terms, or seven terms if the candidate does not pass an examination in one foreign language on beginning candidacy at Cornell University. A candidate must pass language examinations in two foreign languages. Additional requirements include work in a major and two minor subjects, the successful passage of a qualifying examination before formal admission to candidacy, passage of Final Examinations A and B, and the acceptance of a dissertation by the student's Special Committee.

A tuition charge of \$685 and a University fee of \$165 are charged each term (or \$200 for tuition and \$187.50 for fees for students majoring in fields within the state-supported colleges, e.g., Agriculture, Home Economics, and Industrial and Labor Relations). A deposit of \$28 must be made by every applicant for admission after he has received notice of acceptance unless the applicant has previously matriculated as a student at Cornell. This deposit is used to pay the matriculation fee, chest X-ray, and examination-book charge, and covers certain expenses incident to graduation if the student receives a degree. Prospective applicants should consult the *Announcement of the Graduate School*, which may be obtained by writing to the Graduate School, or to the Announcements Office, Edmund Ezra Day Hall, Cornell University.

UNDERGRADUATE WORK IN ASIAN STUDIES

AN IMPORTANT function of the Department of Asian Studies is to offer general and specialized courses open to undergraduates in the languages, history, cultures, and contemporary developments of the countries of East, South, and Southeast Asia. Approximately 25 per cent of the undergraduates in the College of Arts and Sciences elect at least one of these courses, as do many students from other colleges of the University.

A few students each year are accepted as majors in Asian Studies. The applicant for admission to the major must have completed at least one course selected from among those listed in this *Announcement* and be recommended by the instructor in charge of that course. He must have received a minimum grade of 75 in this and in all other courses taken in the Department.

The candidate for the B.A. with a major in Asian Studies is required to complete at least eighteen hours in one of the Asian languages offered at Cornell. The major consists of at least thirty additional hours (which may include further language work), selected by the student in consultation with his adviser, from among the courses listed below numbered 300 and over. Majors normally concentrate in one of the following areas: China, Japan, South Asia, Southeast Asia.

The candidate for Honors must maintain a cumulative average of 85 in courses in the humanities and social sciences. He must also maintain an average of 85 in courses in the Department. In his senior year, the Honors candidate will take a two-term graduate seminar selected from among those listed below in consultation with his adviser, normally taking a seminar relating to the area in which his studies have been concentrated.

The Honors candidate will also take the Honors course (Asian Studies 401-402) in which he writes his Honors paper. At the end of his junior year, the student should consult with the professor with whom he plans to write his paper to obtain permission to register for the Honors course. There will be a comprehensive written examination in May of his senior year, administered by the supervisor of his Honors work.

COURSES OF INSTRUCTION

ASIA, GENERAL

CIVILIZATIONS OF EAST ASIA (Anthropology 241). Fall term. Credit three hours. T Th S 9. Mr. SKINNER.

An introduction to a number of traditional societies in East Asia, including Chinese, Japanese, Thai, and Javanese. Through the controlled comparison of these civilizations, a general analysis is attempted of the social structure of traditional complex agrarian societies. Attention is also given to the way in which social and cultural factors help account for differences among Asian countries in the nature and pace of modernization.

SEMINAR: COMPARATIVE MODERNIZATION OF CHINA AND JAPAN (Anthropology 546). Spring term. Credit four hours. Prerequisite, consent of instructor. Th 2-4. Messrs. SKINNER and SMITH.

A comparative analysis of Ch'ing China and Tokugawa Japan which attempts to relate socio-cultural differences to differences in the response to pressures for change in the 19th century. The seminar endeavors to define and account for the striking contrast in the timing and patterning of modernization in the two societies. On the basis of this comparison, hypotheses are sought which can be tested in other modernizing societies.

COMPARATIVE ECONOMIC SYSTEMS: JAPAN, INDIA, CHINA (Economics 365). Fall term. Credit four hours. M W F 11. Mr. GOLAY.

Capitalism, democratic socialism, and authoritarian socialism in the Far East. Comparative study of major Asian economies in terms of cultural environment, organization of production, social goals, institutions, policies, and economic growth.

CONTINENTAL GEOGRAPHY: ASIA (Geography 314). Spring term. Credit four hours. Prerequisites, Geography 111, or Geology 102. Lectures, M W F 9, and additional assigned problems. Mr. BLOOM.

Physical geography, regional climatology, land use, and natural resources.

THE UNITED STATES AND ASIA (Government 377). Fall term. Credit three hours. No prerequisites. Open to sophomores and upperclassmen. M W F 8. Mr. KAHIN.

An analysis of the relations of the United States with the major states of Asia and with those smaller countries with which it is particularly concerned; attention is also given to the relationship of American policy to the Asian policies of France, Great Britain, and Soviet Russia. Deals primarily with the period since 1945.

SEMINAR IN THE INTERNATIONAL RELATIONS OF ASIA (Government 577). Fall term. Credit four hours. Open to graduate students and qualified seniors who have taken Government 377 or Government 478 and secured the consent of the instructor. Hours to be arranged. Mr. KAHIN.

INDIA: Village Maiden.

INTRODUCTION TO ASIAN ART (History of Art 381). Fall term. Credit four hours. M W F 11. Mr. YOUNG.

A consideration of the major artistic achievements of India, Southeast Asia, China, and Japan, with particular reference to the aesthetic and religious principles underlying the development of the art of these countries. Attention will be focused on selected masterpieces of painting, sculpture, and architecture in order to exemplify the main stylistic and cultural trends of the most important periods.

ART OF INDIA AND SOUTHEAST ASIA (History of Art 386). Spring term. Credit four hours. M W F 11. Mr. YOUNG.

A survey of painting, sculpture, and architecture in India and Southeast Asia from the earliest times to the present, with some consideration of the early periods of art in Iran and Central Asia. Both the physical and metaphysical aspects of the arts will be studied, with particular attention to the development of Buddhism and Hinduism and their influence in formulating the aesthetic expression in these countries.

METHODS OF RESEARCH IN ASIAN ART (History of Art 483). Fall term. Credit four hours. Prerequisite, consent of the instructor. T 2-4:30. Mr. YOUNG.

An introduction to advanced study. The methods involved in stylistic and iconographic analysis as applied to Asian art. Readings in the basic sources and a discussion of the main aesthetic theories. Original works of art will be used where applicable.

PROBLEMS IN ASIAN ART (History of Art 484). Spring term. Credit four hours. Prerequisite, History of Art 483 or consent of the instructor. T 2-4:30. Mr. YOUNG.

Studies in selected topics in the history of Asian art. Discussions and reports.

STUDIES IN ASIAN ART (Art 353, College of Architecture). Spring term. Credit two hours. Open to graduate students and upperclassmen by permission. Hours to be arranged. Mr. ATWELL.

Consideration of specific topics relating to the painting and sculpture of South, Southeast, and East Asia, with emphasis on the ideas, practices, techniques, and interrelationships in the various areas of concentration.

COMPARATIVE SOCIAL STRUCTURE (Sociology 349). Fall term. Credit four hours. Prerequisite, Sociology 101. M W F 2. Mr. MARSH. Offered in 1963-1964 and alternate years.

Structural-functional analysis of the constant and variable features of large-scale industrial and pre-industrial societies, such as China, Japan, the Soviet Union, and the United States. The universality of sociological propositions, originally tested with American data, in the light of data from other societies.

HONORS COURSE (Asian Studies 401-402). Throughout the year. Credit four hours a term. Staff.

This course, in which the student writes an Honors essay, is required of all Honors students in their senior year. It is normally taken with the student's major adviser.

SEMINAR: FIELD RESEARCH (Asian Studies 591-592). Throughout the year. Staff.

Field research seminars for selected advanced students are conducted in South Asia, Southeast Asia, Hong Kong, Taiwan, or Japan by staff members who are themselves working in these areas.
